

**ATTITUDES OF GEOSCIENTISTS TOWARDS GEOETHICS
AND THE INTEGRATION OF GEOETHIC ASPECTS
WITHIN
ACADEMIC GEOSCIENCE SYLLABUS**

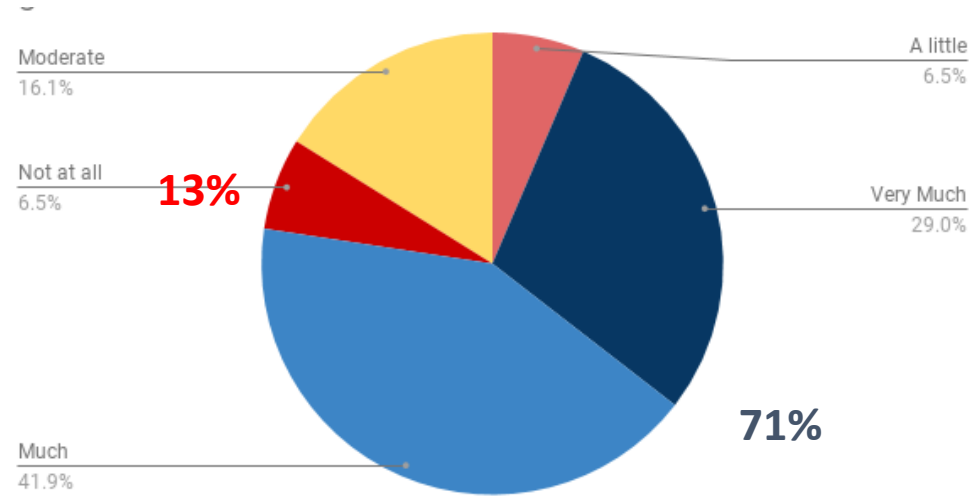

**RESULTS OF A QUESTIONNAIRE
MAY-JUNE 2019**

N = 50

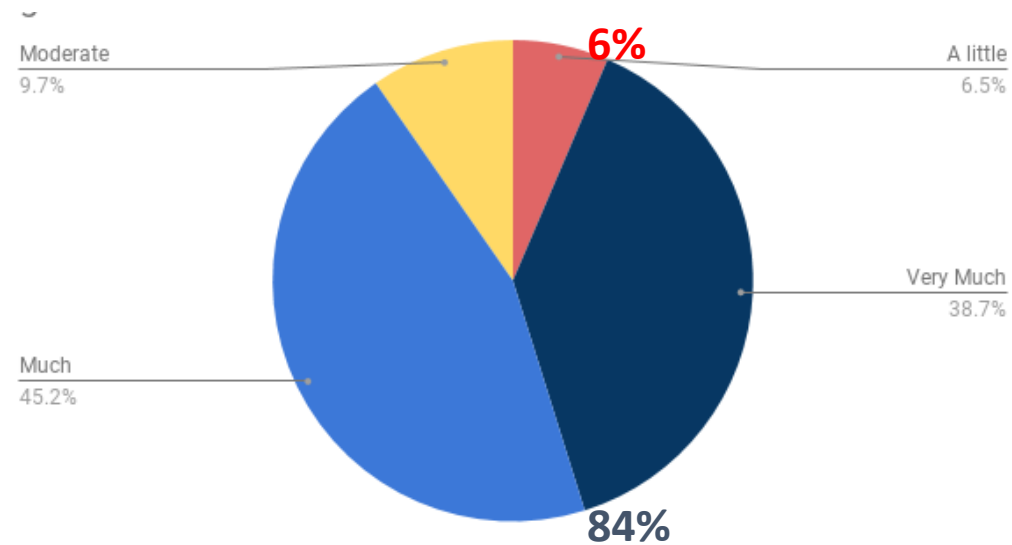

To what extent, the concept of geoethics, is known to you?

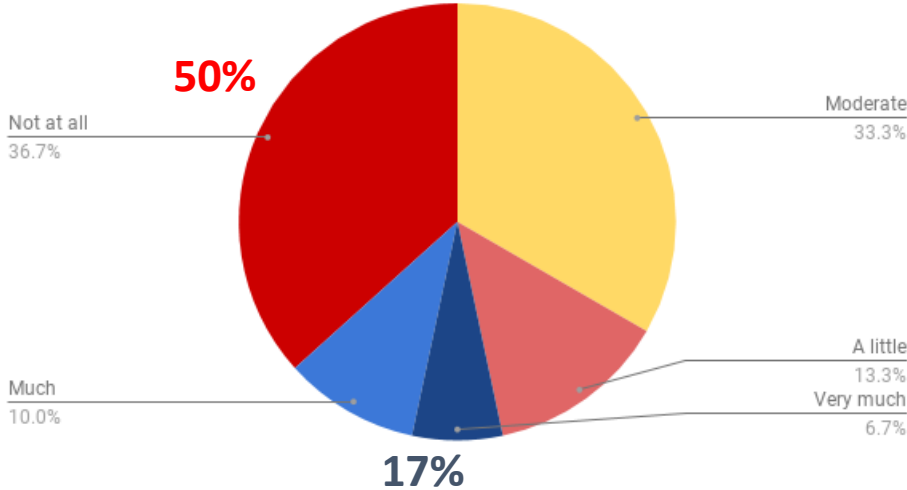

To what extent should geoethical aspects affect the activity of geoscientists?

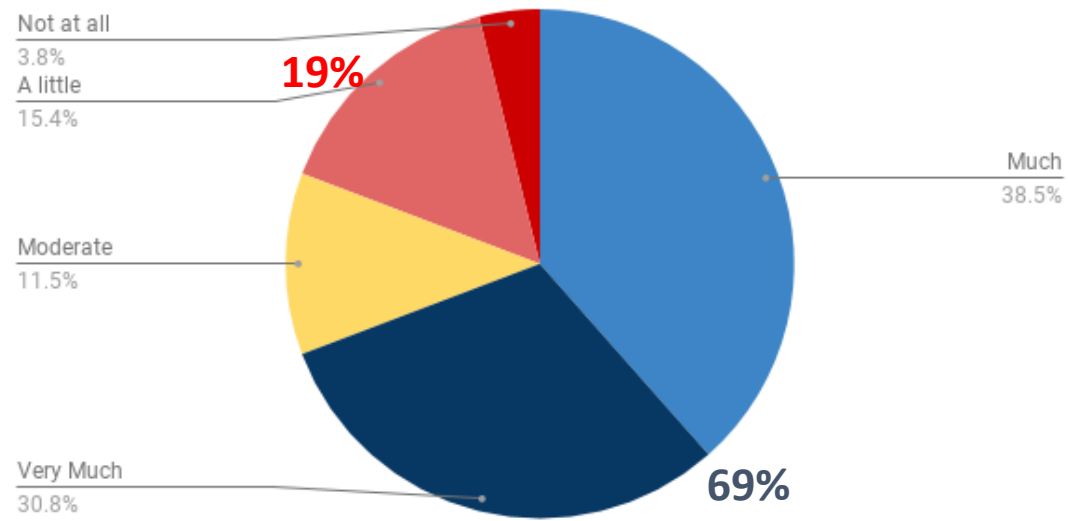

To what extent should the geoscience community deal with geoethical issues and dilemmas?

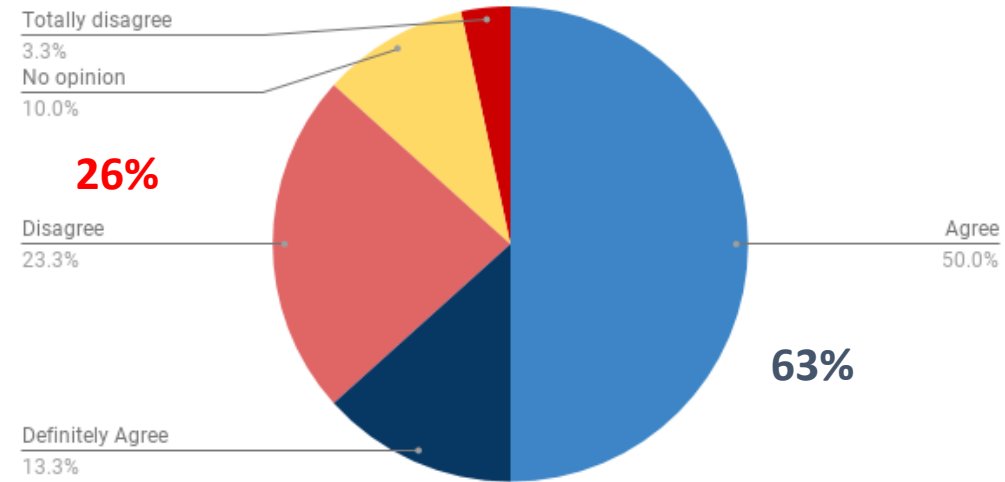

To what extent have you dealt with geoethical issues in your scientific work?

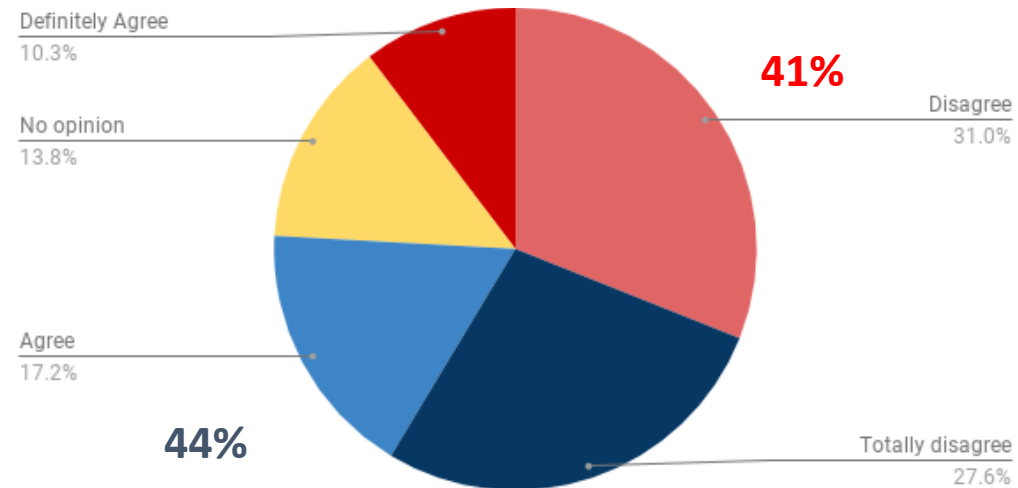

To what extent would you like to incorporate geoethical aspects into courses you will teach in the future?

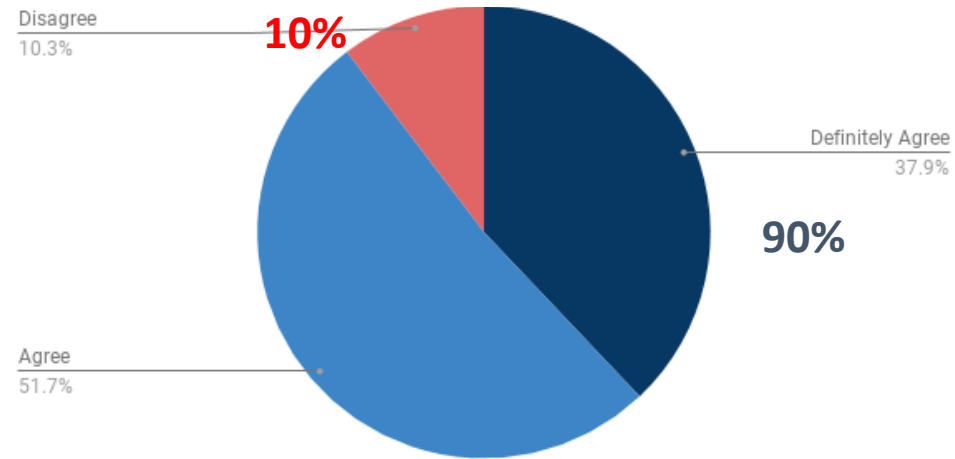

The initial conviction of Italian geoscientists was justified only if they provided misleading information to the public.

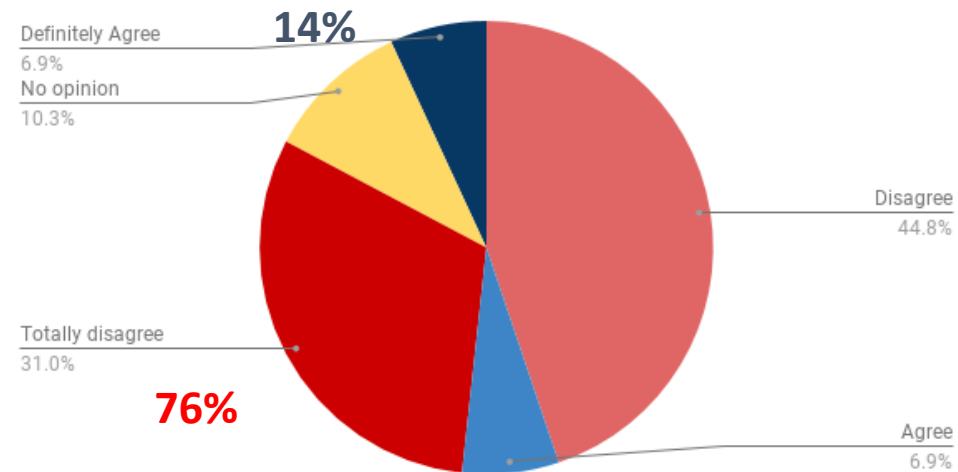

The conviction of the Italian geoscientists was not justified in any case, even if they provided the public with misleading information.

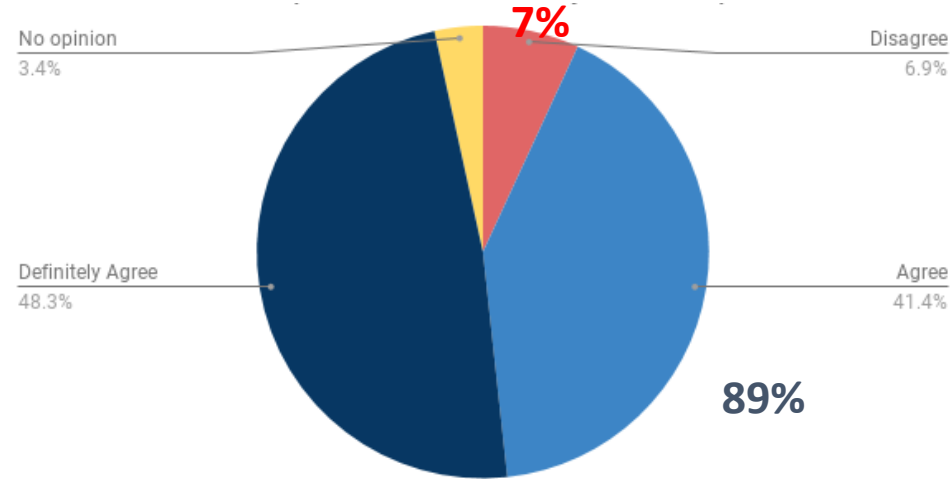

A geoscientist, who raises information in his/her research with implications for public safety, is obliged to provide this information to the general public.

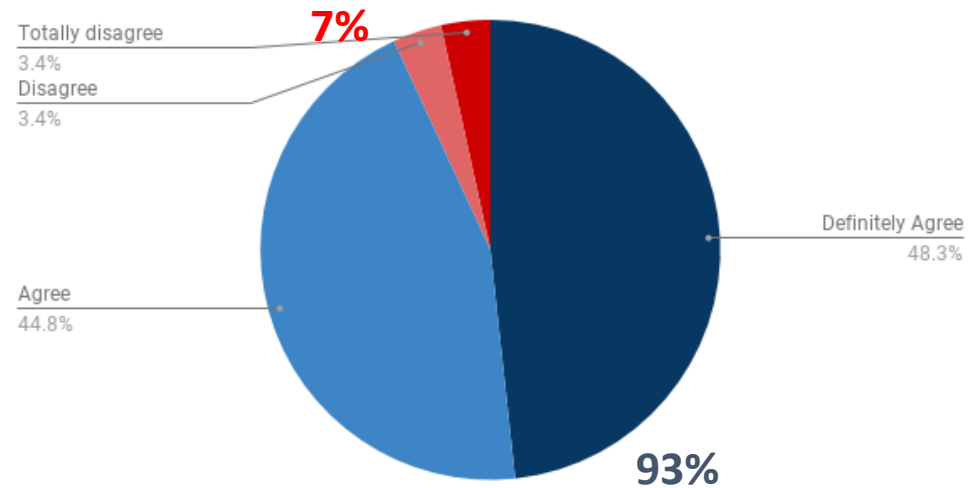

A geoscientist, whose research raises information with implications for public safety, is obliged to provide this information to the scientific community only.

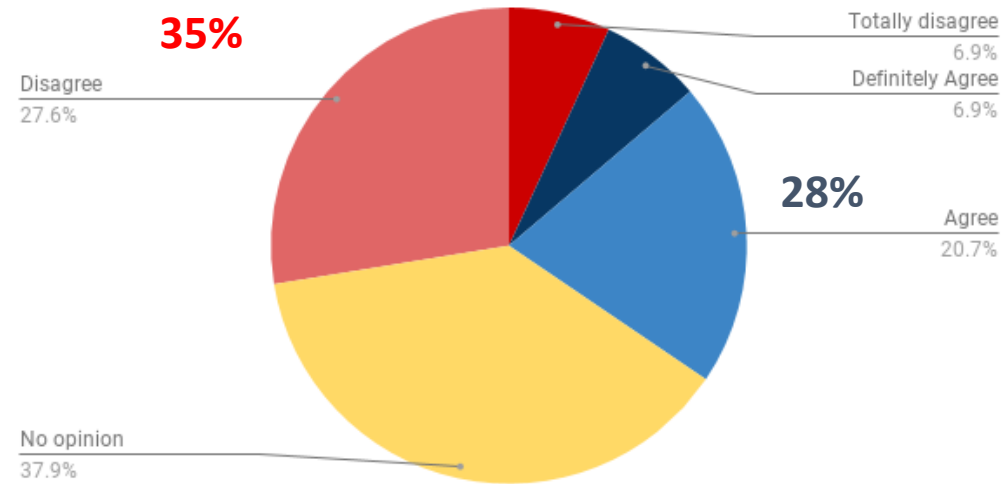

It is the duty of the scientific community to transmit information to the public in a such way that the public will understand its meaning

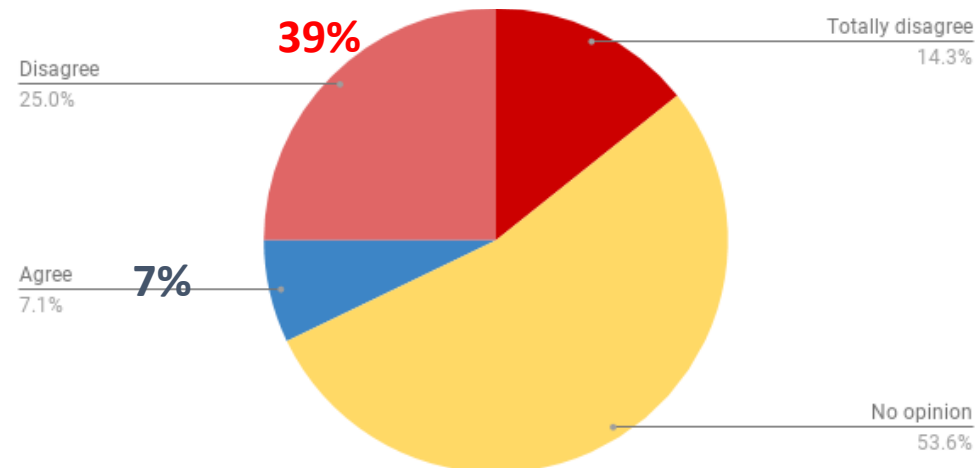

The university training process of geoscientists should provide them with tools for communication with the public.

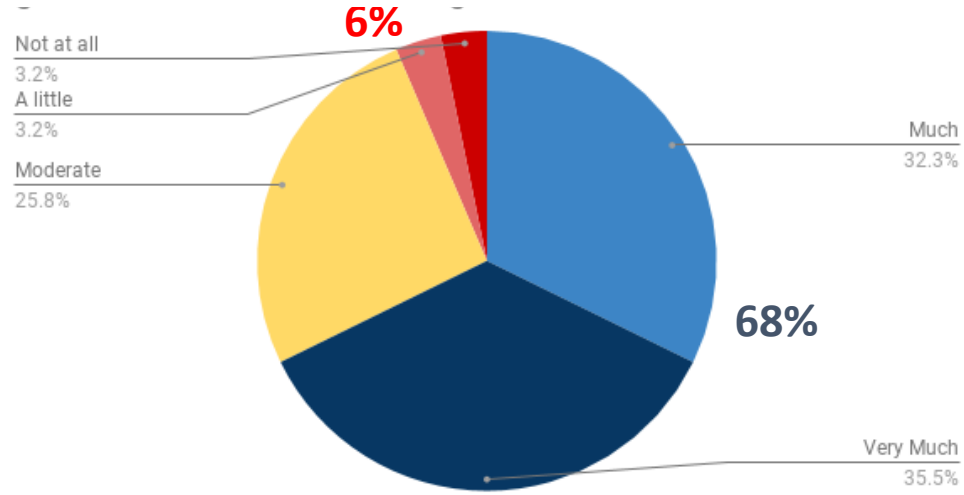

Many geoscientists are active in public controversies related to their fields of research.

Geoscientists in my country do all they can to pass on vital information to the general public.

To what extent should university courses emphasize the geoethical commitment of a geoscientist?

To what extent would you like to incorporate geoethical aspects into the courses you are teaching?
